

INFORMATION SECURITY POLICY

MISSION	DELIGHT OUR PLAYERS, POWER OUR BRANDS AND EMPOWER OUR PEOPLE
VISION	SHAPE THE FUTURE OF ENTERTAINMENT

VALUES

We lead with ambition and create sustainable impact

We invest in our growth and take opportunities to make a difference

We take responsibility, innovate with purpose and move at pace

We value every voice and combine our strengths as one team

Flutter SEA considers information security as a primary objective in conducting business, in line with the company's purpose, corporate values, codes of conduct, and the Group's sustainability strategy.

The adoption of the Information Security Management System, in accordance with ISO 27001 and WLA standards, together with the implementation of this Policy, supports the achievement of strategic objectives and represents a key driver for employee engagement and process improvement.

Through a Risk-Based Approach, Flutter SEA continuously analyzes ICT and security risks and identifies appropriate mitigation actions in order to achieve an acceptable level of residual risk.

Flutter SEA considers the effective application of the Information Security Management System as a commitment and responsibility of the entire organization and calls upon all personnel, at every level, to comply with the principles set out in this Policy within the scope of their respective roles and responsibilities.

THE COMMITMENT OF FLUTTER SEA

The Management of Flutter SEA emphasizes the organization's commitment to:

- promoting the development and continuous evolution of security technological solutions, both adopted and to be implemented, in order to ensure a sustainable and long-term competitive advantage for Flutter SEA, in line with corporate objectives and values;
- ensuring centralized security governance aimed at preserving the confidentiality, integrity, and availability of the Company's information assets;
- supporting the establishment of an appropriate organizational model for information security management, aligned with the Company's growth objectives, and promoting the development of competencies to maintain the effectiveness of protection controls;
- ensuring compliance with applicable laws, regulations, and standards impacting information security, as well as with specific contractual agreements with stakeholders;
- fostering innovation in the field of security to ensure continuous alignment with technological evolution and the adoption of next-generation methods, processes, and IT solutions;
- ensuring security, resilience, and data protection in the services provided to consumers and customers, with the aim of increasing their reliability;
- promoting, within Flutter SEA, a culture and awareness of information security and cyber risks, in order to increase the level of awareness regarding behaviors and guidelines to be followed to prevent the occurrence of threats;
- promoting the adoption of a risk-based approach in relation to the implementation of security measures through the use of a framework integrated into the overall corporate risk management model.

In order to implement strategic objectives and guidelines, the Management considers the Information Security Management System to be a fundamental element of business operations, enabling the systematic identification and management of risk factors and opportunities.

This Policy is periodically updated and made available to stakeholders, the public, and anyone upon request, in the interest of transparency and collaboration.
